NOVUS[®]

NOVUS Clu – ease at the workstation.

The new generation of monitor arms.

The office environment is changing. And so the time has come for more ergonomics and comfort in workstation design and the new Novus Clu monitor arms. Stable and flexible, they make it easier to handle monitors and fulfil all current and future requirements for monitor applications.

The innovative construction with integrated gas spring technology keeps monitors up to 27 inch and 7 kg securely everyone, even in any position. Landscape or portrait, vertical to horizontal: ideal for wearers of varifocals and touchscreen users.

The new design and high-quality “Engineered in Germany” workmanship, as well as a wide variety of models and mounting options, provide users and planners with the best solutions to suit any type of office environment. The new Novus Clu monitor arms offer an elegant and ergonomic way of fulfilling all your requirements.

Make your office work more personal, relaxed and efficient.

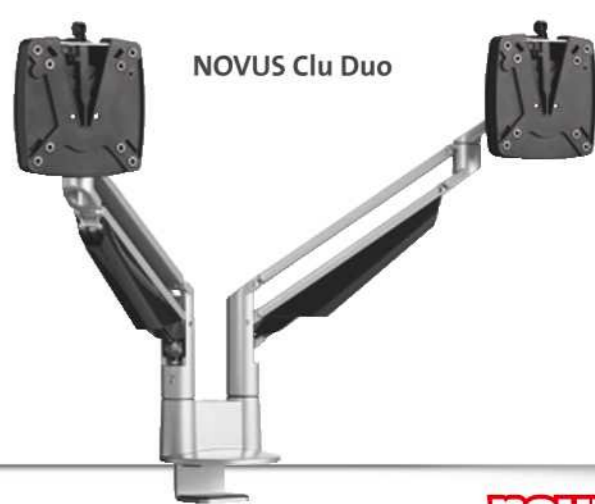

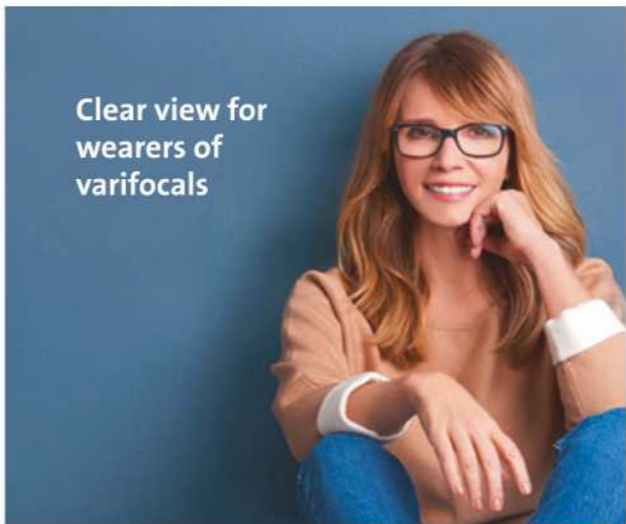

NOVUS Clu – perfect for you!

NOVUS Clu – perfect for you!

The versatile solution for individual requirements.

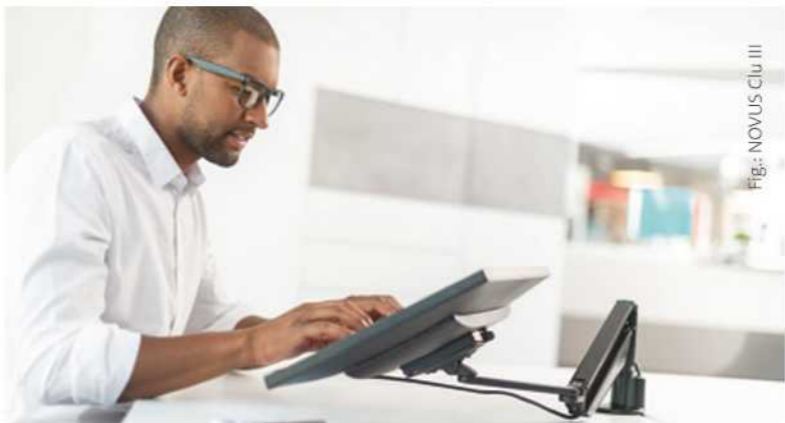

From basic model to double support arm, with sophisticated black, white or silver finish: Novus Clu offers almost unlimited opportunities for modern workstation design.

NOVUS Clu – the allrounder:

Lift, rotate and turn it.

Novus Clu offers top performance: elegant, comfortable, ergonomic and practical. The new monitor arms can be adjusted to the required position easily and without needing any tools.

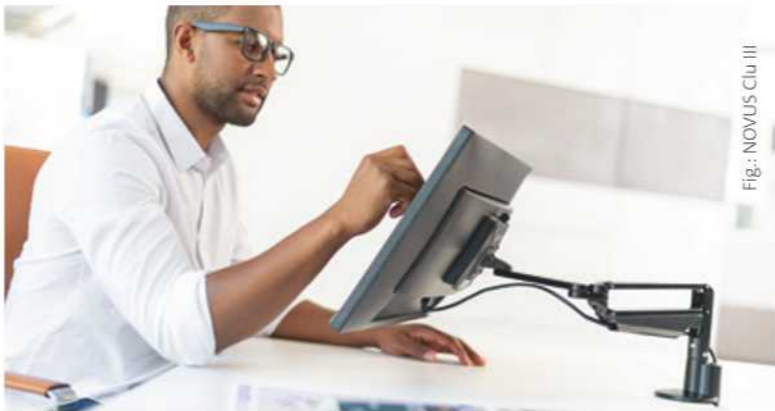

The Novus Clu range of monitor arms allows almost unlimited freedom of movement for monitors. The monitor can be turned from landscape to portrait format and moved in any direction, even completely flat up against an organisation wall or acoustic panel. The powerful, adjustable gas spring technology balances the weight of the actual monitor up to a maximum of 7 kg and therefore ensures extremely easy handling at any time.

The Novus Clu is very versatile: whether you're standing or sitting, the monitor can be adjusted to the optimal position even at height-adjustable desks. Wearers of varifocals can adjust the monitor to suit their field of vision. And the monitor can easily be positioned horizontally for using touch screens or to concentrate on reading, just like you would read a book.

Extreme flexible: even large format monitors can easily be moved into any position you like.

Optimal tilt: Novus Clu III brings the monitor right down to the tabletop.

Exemplary ergonomics: horizontal positioning for using touch screens is also no problem with the Novus Clu III.

Quick & easy: the pivot function makes it easy to adjust the monitor for working in portrait format.

Maximum stability: the clever support arm construction with gas spring technology keeps monitors up to 7 kg securely in the chosen position.

One for two: Novus Clu Duo ensures elegant double monitor solutions with just one mount.

Perfect panorama: two monitors up to 27 inch form a practically seamless screen thanks to Novus Clu Duo.

NOVUS Clu – innovative down to the last detail:

Form and function to perfection.

Standing ovations: the arm articulation of Novus Clu is designed to take up little space and leave more room for working. As they do not exceed beyond the back of the desk, height-adjustable desks can be positioned in blocks, even with double workstations, without causing any conflict when it comes to individual height adjust.

Novus Clu monitor arms are suitable for all office furniture systems. We can also develop special solutions for specific requirements on request. Get in touch with us!

QuickRelease

Monitors can be attached and adjusted **easily**. The holder fits all conventional monitors with the mounting standard 75 x 75 and 100 x 100.

Clever cable guide

All connection cables are organised and protected under the discreet cover. This is where you can also find the powerful **gas spring** for first-class user convenience.

Special project solutions

Various mounting solutions are available to allow you to benefit from the full performance of the new monitor e.g. arms when used in **combination with rail systems**. We can also develop special solutions on request for system rails, office partition walls and desk tops with oval, narrow or other special shapes.

Stable joints

The high-quality pivot joint is significantly flatter than a conventional ball-and-socket joint and therefore offers practically unlimited freedom of movement **in any turning and tilting direction**. Even large monitors are easy to handle and will stay securely in the required position.

NOVUS SlatWall

The Clu is optimal for attachment to **organisation walls and acoustic panels**, such as the Novus MY toolbar or Novus SlatWall.

3-in-1 table mount

The standard mounting component can easily be attached from above and covers three types of mounts in one: **clamp, grommet and drilling mount**. It is suitable for desk top thicknesses of 10 - 50 mm and offers optimum flexibility should the mount type ever need to be changed.

3-in-1: in just a few simple steps, the clamp can be turned into a drilling mount or grommet.

NOVUS Clu – the choice is yours:

New ergonomics at a glance.

We would be happy to offer personalised solutions for specific project and mounting requirements. Contact us!

NOVUS Clu I / NOVUS Clu I SlatWall

The basic model for many applications

- 1-piece aluminium support arm with gas spring support, 2-7kg
- Range: 283 mm (Clu I) / 314 mm (Clu I SW)

With table mount:

Model	Item no	EAN
<input type="checkbox"/> White	990+1011+000	4009729068281
<input checked="" type="checkbox"/> Black	990+1018+000	4009729070796
<input type="checkbox"/> Silver	990+1019+000	4009729068304

With SlatWall mount:

Model	Item no	EAN
<input type="checkbox"/> White	990+1071+000	4009729067949
<input type="checkbox"/> Silver	990+1079+000	4009729066126

NOVUS Clu II

Multitalented for ergonomics

- 2-piece aluminium support arm with gas spring support, 2-7kg
- Range: 433 mm

With table mount:

Model	Item no	EAN
<input type="checkbox"/> White	990+2011+000	4009729068366
<input checked="" type="checkbox"/> Black	990+2018+000	4009729070833
<input type="checkbox"/> Silver	990+2019+000	4009729068380

NOVUS Clu III

Maximum ergonomics

- 3-piece aluminium support arm with gas spring support, 2-7kg
- Additional arm element for exceptionally low monitor positioning
- Range: 457 mm

With table mount:

Model	Item no	EAN
<input type="checkbox"/> White	990+3011+000	4009729068441
<input checked="" type="checkbox"/> Black	990+3018+000	4009729070871
<input type="checkbox"/> Silver	990+3019+000	4009729068465

NOVUS Clu Duo

The perfect solution for two monitors

- Two aluminium support arms with gas spring support, 2x 2-7kg
- For two monitors up to approx. 27 inch and 7 kg
